ABOUT ME

Business Analyst with a background in full-stack development and AWS, comfortable working with both technical teams and business stakeholders. Experience gathering requirements, improving processes, and supporting the delivery of internal business applications.

WORK EXPERIENCE

Junior Data Associate, AJA Labs

Dec 2025 – Present

- Working on live projects, building Power BI dashboards to track and identify fraud cases.
- Involved in AWS deployment work and rebuilding an application using React.
- Working with serverless hosting platforms like Render and Netlify for smaller deployments.

Junior Associate, AJA Labs

Jun 2025 – Dec 2025

- Rebuilt the company website, AJAFirm, along with client websites based on project requirements.
- Worked on the company's internal auditing and fraud analysis application, redesigning parts of the site and adding new features as needed.

Software Tester (Internship), Gieom

Jan 2025 – Feb 2025

- Learned the basics of testing an application before it goes live, covering both manual and automation testing.
- Used Playwright for automation testing and manually tested the site for issues.

EDUCATION

Master of Computer Applications (MCA)

2023 – 2025

Rajagiri College of Social Sciences

BVoc in Software Development

2020 – 2023
