ABOUT

Full-stack developer with hands-on AWS experience deploying and maintaining Flask-based applications. Comfortable across the stack — Flask/Lambda backends, React/HTML/CSS/JS frontends, SQL-backed data, and cloud infrastructure (Lambda, API Gateway, CloudFront, DynamoDB, S3, Cognito). Interested in moving toward AI-focused software development, building on this deployment and infrastructure background.

TECHNICAL SKILLS

AWS (Lambda, API Gateway, CloudFront, DynamoDB, S3, Cognito) • Python • SQL • HTML, CSS, JavaScript • Flask • React • Power BI • Git • Playwright (test automation)

WORK EXPERIENCE

Data Associate, AJA Labs Dec 2025 – Present

- Contributing to AWS deployment work and rebuilding an internal application in React.
- Deploying smaller applications on serverless hosting platforms (Render, Netlify).

Junior Associate, AJA Labs Jun 2025 – Dec 2025

- Primary full-stack developer for ALTeX Hub, a multi-app AWS platform of audit and anomaly-detection tools (AnoDe, Sentinel AI, ARM), covering frontend, backend, infrastructure, and deployment.
- Deployed Flask applications to AWS Lambda via Mangum, behind API Gateway and CloudFront, using DynamoDB and S3 for session state and data storage; worked through Lambda layer size limits to fit these dependencies in a serverless environment.
- Built the platform's admin frontend with AWS Cognito authentication and DynamoDB-backed user management, including a forgot-password workflow and role/permissions handling.
- Rebuilt the company website (AJAFirm) and multiple client websites, and redesigned parts of the internal auditing and fraud-analysis application.

Software Tester (Internship), Gieom Jan 2025 – Feb 2025

- Learned manual and automation testing fundamentals ahead of application release; used Playwright for automation testing alongside manual test coverage.

PROJECTS

- House Price Analysis (Python) — analyzed housing data with pandas to identify key factors affecting property prices.
- Adveda Finance Consultancy Website — built a site for a financial advisory firm to present services and planning tools to clients.
- SkillShare (Android) — app for users to showcase skills and connect with others for collaboration.

EDUCATION

Master of Computer Applications (MCA), Rajagiri College of Social Sciences — 2023–2025

BVoc in Software Development, St. Teresa's College (Autonomous) — 2020–2023

CERTIFICATIONS & TRAINING

- Python for Data Science Workshop — St. Teresa's College
- AI Training (Python, AI Basics & Algorithms) — KELTRON
- Cyber Security Awareness Webinar — RedTeam Hacker Academy
- M-Power Communication Training — Rajagiri College

ACHIEVEMENTS & LEADERSHIP

- Participant, Smart India Hackathon 2023
- Placement Coordinator, St. Teresa's College — coordinated recruitment drives
- Volunteer, International SDG Conference 2024, Rajagiri College
